

Compatibility Chart

1. Overview

This chart helps you confirm which accessories work with each vehicle model, trim, and year. Everything is presented in short, direct lists so you can read it quickly without scanning tables.

2. Vehicle Compatibility Summary

Model A (2018–2024)

- Compatible with all standard accessories
- Fits Base, Mid, and Premium trims
- No modifications needed
- Best option for direct-fit installations

Model B (2020–2024)

- Works with most accessories
- Supported trims: Mid and Premium
- Some components need an updated mounting kit
- Electrical accessories function normally once calibrated

Model C (2017–2022)

- Limited compatibility
- Only basic accessories fit
- Wiring path restrictions reduce support
- Not suitable for larger or electrically integrated accessories

Model D (2019–2024)

- Broad compatibility across all trims
- Most accessories fit physically
- Electrical installations require software calibration
- Good candidate for premium accessory upgrades

Model E (2015–2019)

- Partial support across Base and Mid trims

- Some accessories will function with reduced capability
 - Older ECU versions limit integration features
-

3. Exterior Accessories Compatibility

Roof Rails

- Fully compatible with Models A and D
- Compatible with Model B
- Partial support on Model E due to trim design
- Not suitable for Model C

Side Steps

- Fully fits Model A and Model D
- Fits Model B with updated brackets
- Not compatible with Models C and E

Mud Flaps

- Compatible with all models
- Fitment is straightforward even on older trims

Front Bumper Guard

- Works on Models A and B without changes
 - Fits Model D but requires software coding
 - Not compatible with Models C and E
-

4. Electrical Accessories Compatibility

DRL Kit

- Fully supported on Models A, B, C, and D
- Not compatible with Model E

Parking Sensors

- Supported on Models A, B, D, and E
- Not suitable for Model C due to wiring constraints

Rear Camera

- Works on Models A, B, and C
- Functions on Model D after calibration
- Not compatible with Model E

Ambient Lighting

- Supported on Models A and D
- Partial support on Model E
- Not compatible with Models B or C

5. Fitment Categories

Direct Fit

- Installs with no physical or electrical modification
- Uses factory mounting points
- Ideal for Models A and D

Partial Fit

May require:

- Additional brackets
- Wiring extension
- Software reset or calibration
- Acceptance of reduced feature set

Not Compatible

Occurs when:

- Mounting geometry differs significantly
- Wiring routes are blocked
- ECU version doesn't support the accessory
- Trim design causes interference
