

User Manual

Complete User Documentation

Introduction

Purpose of This Manual

This manual explains how to use the portal efficiently, from logging in to advanced features. It's written for everyday users, supervisors, and admins who need clear, practical guidance.

Who This Manual Is For

- New users setting up the portal for the first time
- Technicians and engineers accessing technical publications
- Managers reviewing data or approving requests
- Administrators configuring roles and permissions

How to Use This Manual

Each section focuses on a specific part of the portal. You can read it end-to-end or jump to the section you need through the table of contents in Word.

Getting Started

Accessing the Portal

1. Open the portal URL in your browser.
2. Enter your username and password.
3. If it's your first login, create a new password when prompted.

Your dashboard appears once authentication succeeds.

Supported Browsers

The portal works best on:

- Chrome
- Edge
- Firefox

Older browsers may cause slower loading or broken layout.

Basic Layout Overview

The portal follows a simple, consistent design:

- Left navigation menu for all modules
- Top bar with profile, alerts, and settings
- Main content area where documents, tools, and data load

This layout stays the same across all sections.

User Profile and Settings

Updating Personal Information

You can edit your display name, language preference, and time zone. These settings only affect your account.

Changing Your Password

1. Open your profile dropdown.
2. Select Change Password.
3. Enter your current password, then create a new one.
4. Save your changes.

If you forget your password, use the Reset Password link on the login page.

Notification Preferences

You can choose how the portal notifies you about updates:

- In-portal alerts
 - Email notifications
 - Optional SMS (if enabled in your organisation)
-

Navigation Basics

Main Menu

The left-side menu lists all major sections. Depending on your role, you may see:

- Technical Documents
- Diagnostic Information
- Repair Procedures
- Wiring Diagrams
- Service Bulletins
- Parts Information
- Admin Panel (for authorised users)

Click any section to expand its categories.

Breadcrumbs

Breadcrumbs at the top show your current path, for example:

Home > Technical Documents > Electrical Systems

They make it easy to move back without using the browser back button.

Search Bar

The search bar supports:

- Keywords
- VIN search (if available)
- Document category
- Publication date filters

Search results appear instantly with filter options on the left.

Working With Documents

Opening Documents

Click a document title and it loads in the built-in viewer. Most documents open as PDFs, while others may load as HTML pages.

Viewer Tools

The document viewer includes:

- Zoom controls
- Rotate pages
- Download option
- Print option
- Page thumbnails
- Related documents panel

Version History

Some documents show version history. When this is available:

- Current version appears at the top
 - Older versions are listed below
 - Superseded or withdrawn publications are clearly marked
-

Diagnostics and Technical Information

Diagnostic Procedures

Diagnostic modules provide step-by-step guidance for identifying faults. You'll get:

- System overviews
- Fault code explanations
- Possible causes
- Recommended actions

Some sections include interactive flowcharts or conditional steps.

Wiring Diagrams

Wiring diagrams show electrical circuits with colour codes, connectors, and pin details. You can zoom in for clarity or switch between systems using the panel on the left.

Technical Bulletins

Bulletins contain official updates, fixes, or clarifications. They usually include:

- Background
 - Affected models
 - Conditions
 - Action or repair instructions
-

Repair and Service Procedures

Accessing Procedures

Repair procedures are grouped by system, such as:

- Body and chassis
- Electrical
- Powertrain
- HVAC

Each procedure includes safety notes where applicable.

Structure of a Procedure

Most procedures follow the same structure:

- Summary
- Tools required
- Steps in sequence
- Torque values
- Notes and cautions
- Illustrations

This makes them easy to follow even for complex tasks.

Parts Information

Parts Lookup

The parts section includes:

- Diagrams
- Part numbers
- Descriptions
- Quantity information

Use the search bar to find a specific part or browse by system.

Model and Year Filters

Filters help narrow parts based on:

- Vehicle model
- Model year
- Variant

This ensures accurate selection and reduces ordering mistakes.

User Roles and Permissions

Role Types

Typical roles include:

- Viewer – Read-only access
- Editor – Can upload or modify documents
- Publisher – Can release or update official content
- Admin – Full control over the portal

Managing Users

Admins can:

- Add or remove users
- Assign permissions
- Monitor activity logs
- Reset passwords

Changes apply instantly across the portal.

Admin Panel (For Authorised Users)

Content Management

Admins can upload, edit, or archive documents. Supported formats may include PDF, HTML, images, and metadata files.

Audit Logs

The admin panel keeps records of:

- Sign-ins
- Document updates
- Permission changes

These logs help with compliance and internal reviews.

Troubleshooting

Common Issues

- Page not loading – clear browser cache
- Missing documents – check role permissions
- Slow performance – switch to a supported browser
- Login errors – reset password using the login page

Support Contacts

Your organisation may provide:

- Helpdesk email
 - Internal support phone number
 - Training material
 - Escalation points for admins
-

Glossary

A short glossary helps new users understand common terms:

VIN – Vehicle Identification Number

TP – Technical Publication

SB – Service Bulletin

DTC – Diagnostic Trouble Code

IPC – Instrument Panel Cluster
